Dear Mr. Filipidis

Chemical resistance

At your suggestion about chemical resistance we can answer your questions as follows:

The polyester concrete we use for the production of our channel-systems is resistant against the specified extracts of the chemicals in the given concentrations (brief load with 40° C)

Natrium Hydroxid	10 %
Salpetersäure	10 %
Natrium Carbonat	20 %

If you have further questions, don't hesitate to contact us.

With regards
